Discourse Of Medicine Dialectics Of Medical Interviews

Religious Dialectics of Pain and Imagination - Mar 30 2021
Explores the possibility of a postmodern liberation rhetoric. Stull (English, Indiana U.-East) uses rhetoric to address the question of how humans can imagine better worlds when surrounded by unspeakable pain. Defines terms such as postmodern, pain, imagination, and religion, and discusses the theory and practice of four contemporary rhetoricians--postmoderns Kenneth Burke and Thomas Merton, and liberationists Paulo Freire of Brazil and Oscar Romero of El Salvador. Annotation copyright by Book News, Inc., Portland, OR

Against Biological Determinism - Feb 21 2023

The Dialectics of Modernization - Sep 16 2022
Jurgen Habermas rarely mentioned China and the developing countries. This book demonstrates that Habermas' theory of modernity and modernization, based on his theory of communicative action, is more relevant to China than any other theory of modernization. Habermas' theory provides a better conceptual basis for a new and rewarding interpretation of the Chinese discourse of modernization that finally led to the idea of socialist modernization with Chinese characteristics. The Dialectics of Bio-communication & Alternative Medicine - Jul 26 2023

Medicine and Dialectics - Jun 25 2023

Storytelling in Medicine - Sep 23 2020
Throughout our lives, story is the medium each of us uses to make sense of our environment and relationships. Stories provide meaning and context, enriching our experiences and equipping us with a framework to navigate our existence. Storytelling in Medicine is a unique, practical book for healthcare trainees, practitioners and educators that explores the ideas and practice of narrative and storytelling that lie at the very heart of clinical medicine and the patient 'experience' of care. It shows how story and narrative can be used effectively to help convey concepts such as prognosis and the effect of illness upon life, and to prepare patients and their relatives for difficult and painful news. Offering a particular insight into communication by and between healthcare professionals, and how it can be refocused and improved, the book is an invaluable teaching aid for educators working in both small and large formats, and for under- and postgraduate students. Deciphering Motivation in Psychotherapy - Nov 18 2022

I have often stated to students that I felt that one of the most important characteristics of a psychotherapist is the ability to tolerate ambiguity. As Allen so aptly points out in this creative and valuable book, my observation contains an implicit assumption that requires a clear statement in order for it to be understood. Before ambiguity can be tolerated, it must be recognized. The psychotherapist who accepts the presentations of the patient at face value is never faced with the difficult problem of tolerating the ambiguity that is so intrinsic to the circumstances that bring many people to treatment. In this volume, Allen has undertaken the task of helping the reader to recognize ambiguity in all of its manifestations, to understand it better, and, having understood it, to help the patient to grow beyond it. Ambiguity, in Allen's view, arises from a dialectical conflict, whether it is between the self and the system, intrapsychic and wholly within the self, or social, when the individual is torn between competing reference groups. Psychotherapy is a process by which the dialectic can be brought to consciousness so that a synthesis can be achieved. The dialectic that engages the individual, and often is played out between the individual and the system, parallels the struggle between attachment and individuation. Ancient Greek Medicine in Questions and Answers - Sep 28 2023
This volume provides a set of in-depth case studies about the role of questions and answers (Q&A) in ancient Greek medical writing from its Hippocratic beginnings up to, and including, Late Antiquity. The
This book investigates the philosophical components of Christian faith in creation, by analyzing the distinction and the relation between creation and its Creator. The writings of Edward Schillebeeckx and David Burrell supply a terminology of distinction and relation that shapes the discourse, following in the footsteps of Aquinas. Poulsom elucidates the relational dialectic in the thought of Schillebeeckx as a way of thinking about the Creation and offers a helpful comparison with the thought of David Burrell. Relational dialectic is an organizing principle, not only of Schillebeeckx's account of creation, but of his philosophical theology more generally. It can operate as a hermeneutic for his material on praxis and humanism, in a way that resolves some problems noted by other Schillebeeckx scholars. Poulsom's interpretation of Schillebeeckx enriches current approaches to this thinker and offers a significant contribution to thinking on the doctrine of Creation and issues surrounding the 'ontological distinction' which is of major concern in philosophical theology today. The Handbook of Social Studies in Health and Medicine - Jan 28 2021

This book brings together world-class figures to provide an indispensable, comprehensive resource book on social science, health and medicine. The Dialectics of Friendship - Jun 01 2021

First published in 1989, The Dialectics of Friendship explores the ideals and paradoxes of friendship against the backdrop of other relationships. The book begins with an introduction to the subject of friendship in its historical and cultural setting. Following chapters explore the ideal of friendship in classical Greece, and the richness and ambiguities of friendship in the Christian tradition. The social dimensions of friendship are discussed, including among children, between men, between women, and between humans and animals, and the wider historical and political aspects of friendship are examined. The Dialectics of Friendship will appeal to those with an interest in the sociology, psychology, and history of friendship, as well as psychoanalysis, literary criticism, and classics. Dialectics and social theory - Apr 23 2023

Parasuicidality and Paradox - Jun 20 2020

“This book describes parasuicidality from a different perspective, yet still within the framework of DBT. These concepts will be helpful to clinicians, who often spend much of their time dealing with these troubling behaviors. This book is well worth the price and the reader will not be disappointed." Score: 94, 4 stars --Doody's "Ross Ellenhorn brings a fresh, new look at what has been called parasuicidality. Rather seeing it solely as a medicalized symptom of mental disorder, he incisively shows how threats of suicide emerge from the social context and can be better understood and treated within a framework of social relationships. This well documented and clearly written book is must reading for anyone interested in better understanding and dealing with parasuicidality. " "This book deals with the issue of parasuicidality using a dialectical behavior therapy (DBT) approach, but posits that clinical interactions aid and abet that specific behavior. It presents both theoretical and pragmatic ideas of how to deal with patients who often pose the greatest challenge to clinicians. " Gary B Kaniuk, Psy.D. (Cermak Health Services) --Peter Conrad, Harry Coplan Professor of Social Sciences, Brandeis University, and author of The Medicalization of Society: On the Transformation of Human Conditions into Medical Disorders In this unique and groundbreaking book, Dr. Ellenhorn offers a very different approach to assisting parasuicidal patients with their problems, an approach that avoids medicalized interactions while enhancing authentic encounters with patients. He makes extensive use of vignettes to demonstrate various types of scenarios between clinicians and patients. A number of other effective techniques are discussed, including: Ways to enhance team treatment planning through a brainstorming process called "The Hourglass" Alternative methods of documenting treatment that serves to protect clinicians from concerns about liability Helping patients focus on life goals and changing themselves through clinician-patient interactions

An Introduction to the history of medicine c. 2 - Dec 07 2021

Operative Medicine and Responsibility - Aug 27 2023

Contextualizing Pragma-Dialectics - Jun 13 2022
Contextualizing Pragma-Dialectics contains a selection of 18 article reporting on research conducted in the past decade in which the institutional context in which argumentative discourse takes place is systematically taken into account. Some articles provide relevant theoretical backgrounds, other articles make clear how the extended pragma-dialectical theory can be used to analyse and evaluate argumentative discourse in specific institutional contexts. Next to argumentative discourse in the legal domain and the medical context of health communication, a great deal of attention is paid to various argumentative practices in the political domain or dealing with specific social issues. A contribution on multimodal argumentation is also included. All contributing authors are actively engaged in the International Learned Institute for Argumentation Studies (ILIAS). Edinburgh Companion to the Critical Medical Humanities - Mar 10 2022

In this landmark Companion, expert contributors from around the world map out the field of the critical medical humanities. This is the first volume to introduce comprehensively the ways in which interdisciplinary thinking across the humanities and social sciences might contribute to, critique and develop medical understanding of the human individually and collectively. The thirty-six newly commissioned chapters range widely within and across disciplinary fields, always alert to the intersections between medicine, as broadly defined, and critical thinking. Each chapter offers suggestions for further reading on the issues raised, and each section concludes with an Afterword, written by a leading critic, outlining future possibilities for cutting-edge work in this area. Topics covered in this volume include: the affective body, biomedicine, blindness, breath, disability, early modern medical practice, fatness, the genome, language, madness, narrative, race, systems biology, performance, the postcolonial, public health, touch, twins, voice and wonder. Together the chapters generate a body of new knowledge and make a decisive intervention into how health, medicine and clinical care might address questions of individual, subjective and embodied experience. Keeping in Touch With Pragma-Dialectics - Jan 20 2023

"Keeping in touch with Pragma-Dialectics" is written to honor Frans van Eemeren and his work in the field of argumentation theory on the occasion of his retirement. The volume contains 17 contributions from teams of authors consisting of a combination of a pragma-dialectician and one or two researchers with a different background in the field of argumentation. In this volume, comparisons between the pragma-dialectical approach and other approaches are made, aspects of strategic maneuvering such as the use of presentational techniques, adaptation to the audience and the selection of topics are dealt with and the influence of specific institutional contexts such as politics, medicine and internet forums on strategic maneuvering are discussed. Black and White in a Green Land - Mar 22 2023

The Fifth Influence - May 12 2022
THE FIFTH INFLUENCE OR, THE DIALECTICS OF PLEASURE "Th is book is about everything you ever wanted to know about pleasure, but did not know where to fi nd the answers." - Alexander Ovsich Ecclesiastes 3-12 and 3-13: I know that there is nothing better for them than to be happy and enjoy themselves as long as they live; also that it is God s gift to man that every one should eat and drink and take pleasure in all his toil. - 8-15 it says. And I commend enjoyment for man has no good thing under the sun but to eat and drink, and enjoy himself, for this will go with him in his toil through the days of life which God gives him under the sun; "To my knowledge, only one psychological theory of motivational interactions has been put forward: Cabanac holds that pleasure is the common currency guaranteeing the trade-off necessary for achieving the ranking of concurrent motivations. In other words, in his view, organisms decide to commit to the activity that maximizes pleasure." - Patrick Anselme "Th e reasons that Michel Cabanac gives for his views on pleasure are good reasons, because they are supported by arguments about evidence, and not simply opinions based upon introspection. Indeed, the main pleasure that I gained from this book came from reading about the very elegant experiments that Michel and his colleagues have conducted over the years. In this respect, I fi nd it hard to believe that other people's experience will be diff erent from mine." - David McFarland"
Organizational Culture and Ethics in Modern Medicine - Aug 23 2020
Technological developments and improved treatment methods have acted as an impetus for recent growth and change within the medical community. As patient expectations increase and healthcare organizations have come under scrutiny for questionable practices, medical personnel must take a critical look at the current state of their operations and work to improve their managerial and treatment processes. Organizational Culture and Ethics in Modern Medicine examines the current state of the healthcare industry and promotes methods that achieve effective organizational practice for the improvement of medical services in the public and private sphere. Focusing on patient communication, technology integration, healthcare personnel management, and the delivery of quality care, this book is a pivotal reference source for medical professionals, healthcare managers, hospital administrators, public health workers, and researchers interested in improving patient and employee satisfaction within healthcare institutions.

Holistic Health and Biomedical Medicine - Apr 30 2021
Holistic Health and Biomedical Medicine outlines a new framework for social science research. Illustrated in an analysis of the American health care system, Lyng presents an empirical study of the relationship between medical knowledge and the social structure of medical practice in America. Through a synthesis of ideas from such diverse perspectives as classical Marxian theory and the medical model embraced by the holistic health movement, Lyng articulates a "medical countersystem" that is contrasted against the traditional biomedical model of medical practice. What results is an entirely unique Marxian analysis of the U.S. health care system, one that examines how the system evolved historically as well as describes several possibilities for the future of medicine in America.

Studies In The History Of Alternative Medicine - Jul 22 2020
A collection of essays focused largely on the 19th century when alternative medicine as opposed to orthodox medicine was not accepted as "professional". Historians in this book explore the dissent which arose in various local and national contexts. The Discourse of Medicine - Oct 29 2023
This is the first full-length monograph devoted to the study of the talk between physicians and patients in a medical interview. Methods are developed to describe, analyze and interpret the discourse. Additionally, a critique and review of previous research in this area is included. In the course of the work, a critique of more traditional methods, studies, and interpretations of medical interviews is presented. The Palgrave Handbook of Social Theory in Health, Illness and Medicine - Feb 09 2022
This wide-reaching handbook offers a new perspective on the sociology of health, illness and medicine by stressing the importance of social theory. Examining a range of classic and contemporary female and male theorists from across the globe, it explores various issues including chronic illness, counselling and the rising problems of obesity. To Relieve the Human Condition - Jul 02 2021
Argues that standard forms of bioethics support the technological utopianism of medicine. Puts forth an alternative agenda arguing that the task of bioethics is to explore the moral significance of the body as it is expressed in the discourse and practice of moral and religious traditions. The Dialectics of Schizophrenia - May 24 2023
Defining the nature of schizophrenia continues to be one of the central challenges left to psychiatry and medical science. The Dialectics of Schizophrenia summarizes the various approaches and points up their weaknesses and strengths. Handbook of Cognitive Behavioral Therapy for Pediatric Medical Conditions - Oct 05 2021
This handbook offers a comprehensive review of cognitive behavioral therapy (CBT) for working in integrated pediatric behavioral health care settings. It provides research findings, explanations of theoretical concepts and principles, and descriptions of therapeutic procedures as well as case studies from across broad conceptual areas. Chapters discuss the value of integrated care, diversity issues, ethical considerations, and the necessary adaptations. In addition, chapters address specific types of

4
pediatric conditions and patients, such as the implementation of CBT with patients with gastrointestinal complaints, enuresis, encopresis, cancer, headaches, epilepsy, sleep problems, diabetes, and asthma. The handbook concludes with important directions in research and practice, including training and financial considerations. Topics featured in this handbook include: Emotional regulation and pediatric behavioral health problems. Dialectical Behavior Therapy (DBT) for pediatric medical conditions. Pharmacological interventions and the combined use of CBT and medication. CBT in pediatric patients with chronic pain. CBT for pediatric obesity. CBT-informed treatments and approaches for transgender and gender expansive youth. Medical non-compliance and non-adherence associated with CBT. Training issues in pediatric psychology. The Handbook of Cognitive Behavioral Therapy for Pediatric Medical Conditions is an essential resource for researchers and graduate students as well as clinicians, related therapists, and professionals in clinical child and school psychology, pediatrics, social work, developmental psychology, behavioral therapy/rehabilitation, child and adolescent psychiatry, nursing, and special education. Korea Reimagined - Nov 06 2021

What do science, technology, and medicine mean from Korea? In this inaugural volume of WashU Ventures in Korean Studies, the authors set out to answer the question which has underpinned the rise of new interests within Korean studies: science studies, history of technology, and medical humanities. The essays here range across a wide array of topics, from sedge craft and traditional medicine to mental health, electricity, and kimchi refrigerators. Yet they cohere around investigating the relationship between Korean society and the central human activities of knowing nature, making things, and healing bodies. To better understand contemporary Korea as well as its process of modernization, this volume presents three themes: innovation as method and history, healing and medical identity, and the dialectics of global and local technologies. Handbook on the Sociology of Health and Medicine - Dec 19 2022

This timely Handbook provides an essential guide to the major topics, perspectives, and scholars in the sociology of health and medicine. Contributors prove the immense value of a sociological understanding of central health and medical concerns, including public health, the COVID-19 pandemic, and new medical technologies. Table of Contents: The nature of medicine A story about a patient with aortic stenosis What are facts in medicine? Clarify the chain of events that led to the present state: the case as a narrative The case of Myra Manner Examine your presuppositions and preconceptions Separate and examine the values at issue A question of judgment The patient, the doctor, and the relationship Observation, prognosis, and prognosticating Thinking in medicine Accepting the challenge. Sociology as Applied to Health and Medicine - Dec 27 2020

A new edition of a seminal textbook that offers an up-to-date, concise and theoretically and empirically informed introduction to the core issues in the sociology of health and health care. It includes updated chapters on established themes of social aspects of health, disease and medical practice, social structures and the organisation of health services, as well as brand new chapters on contemporary topics such as globalisation, the sociology of the body and digital technologies. As proven by previous editions, this text has special salience for students of medicine and allied health programmes. Moreover, with increased attention to international perspectives and examples and an accessible writing style, it remains an ideal choice for undergraduate and postgraduate health modules on sociology courses across the world. New to this Edition: - Increased emphasis on global perspectives and international examples - All existing chapters thoroughly updated - New chapters on globalisation and health, re-conceptualising bodies and digital health and health care ensure that the book takes the latest developments in the discipline into account. An Introduction to the History of Medicine - Apr 11 2022

The Hermeneutics of Medicine and the Phenomenology of Health - Jan 08 2022

Fredrik Svenaeus' book is a delight to read. Not only does he exhibit keen understanding of a wide
range of topics and figures in both medicine and philosophy, but he manages to bring them together in an innovative manner that convincingly demonstrates how deeply these two significant fields can be and, in the end, must be mutually enlightening. Medicine, Svenaeus suggests, reveals deep but rarely explicit themes whose proper comprehension invites a careful phenomenological and hermeneutical explication. Certain philosophical approaches, on the other hand - specifically, Heidegger's phenomenology and Gadamer's hermeneutics - are shown to have a hitherto unrealized potential for making sense of those themes long buried within Western medicine. Richard M. Zaner, Ann Geddes Stahlman Professor of Medical Ethics, Vanderbilt University The Transmission of Chinese Medicine - Oct 17 2022

This is one of the first studies of traditional medical education in an Asian country. Conducting extensive fieldwork in Kunming, the capital of Yunnan Province in the People's Republic of China, Elisabeth Hsu became the disciple of a Qigong master a scholarly private practitioner, who almost wordlessly conveys esoteric knowledge and techniques; attended seminars given by a senior Chinese doctor, an acupuncturist and masseur, who plunges his followers into the study of arcane medical classics, and studied with students at the Yunnan College of Traditional Chinese Medicine, where the standardised knowledge of official Chinese medicine is inculcated. Dr Hsu compares the theories and practices of these different Chinese medical traditions and shows how the same technical terms may take on different meanings in different contexts. This is a fascinating, insider's account of traditional medical practices, which brings out the way in which the context of instruction shapes knowledge. Covid-19 and the Dialectics of Global Pandemics in Africa - Aug 15 2022

The prevalence of global pandemics has been timeless and universal. In 1918, the Spanish Flue grounded Spain and her neighbours. In 1997, 2014 and 2020, the Ebola virus wreaked havoc in West Africa in the same manner that polio had ravaged the globe. Since 2019, the Coronavirus has forced most economies onto a downward spiral. Despite concerted global attempts at observing World Health Organization guidelines, the Coronavirus has been changing peoples' lives, forcing most economies onto their knees, endangering lives and livelihoods, making a mockery of global medicine and causing the widespread despair and helplessness that has come to be known as 'the new normal'. Unlike the other pandemics, the mayhem, complexities and dialectics caused by Covid-19 have been matchless, requiring a systematic study and necessitating a volume like this one. The volume's 16 well-researched chapters argue that despite Covid-19's enormous lessons and predictions about even greater future pandemics, humanity can ill-afford to relent in its determination to conquer the pandemic in the same way that human resolve has defeated past pandemic. As such, the volume provides hope and direction to the global community on how best to deal with Covid-19 and pandemics of similar or even higher magnitude in the future. Clinical Communication in Medicine - Feb 26 2021

Highly Commended at the British Medical Association Book Awards 2016 Clinical Communication in Medicine brings together the theories, models and evidence that underpin effective healthcare communication in one accessible volume. Endorsed and developed by members of the UK Council of Clinical Communication in Undergraduate Medical Education, it traces the subject to its primary disciplinary origins, looking at how it is practised, taught and learned today, as well as considering future directions. Focusing on three key areas - the doctor-patient relationship, core components of clinical communication, and effective teaching and assessment - Clinical Communication in Medicine enhances the understanding of effective communication. It links theory to teaching, so principles and practice are clearly understood. Clinical Communication in Medicine is a new and definitive guide for professionals involved in the education of medical undergraduate students and postgraduate trainees, as well as experienced and junior clinicians, researchers, teachers, students, and policy makers. Cambridge Handbook of Psychology, Health and Medicine - Aug 03 2021

This third edition of the much acclaimed Cambridge Handbook of Psychology, Health and Medicine offers a fully up-to-date, comprehensive, accessible, one-stop resource for doctors, health care
professionals, mental health care professionals (such as psychologists, counsellors, specialist nurses), academics, researchers, and students specializing in health across all these fields. The new streamlined structure of the book features brief section overviews summarising the state of the art of knowledge on the topic to make the information easier to find. The encyclopaedic aspects of the Handbook have been retained; all the entries, as well as the extensive references, have been updated. Retaining all the virtues of the original, this edition is expanded with a range of new topics, such as the effects of conflict and war on health and wellbeing, advancements in assisted reproduction technology, e-health interventions, patient-reported outcome measures, health behaviour change interventions, and implementing changes into health care practice. **Global Health Governance and Commercialisation in India** - Jul 14 2022

Global health governance has been the subject of wide scholarship, more recently brought to the fore by priorities for global health defined by the Sustainable Development Agenda. The health landscape itself has changed dramatically in the last two decades, shaped by cross-border flows of capital, ideas, technology intermediated through the complex interaction between global, national and local actors and institutions. This book analyses the complex terrain of global health governance and local responses to new global forms of integration and fragmentation in India. It unpacks, both conceptually and empirically, local manifestation and translation of global health architecture and regimes and how these processes influence public health policy and practice; as well as to what extent rules and flows are complied with, resisted and transformed at national and sub-national levels. Drawing together critical scholarship on interactions between global and local actors, focusing on processes, dilemmas, conflicts and trade-offs that such engagement presents for national health policies and health systems, it speaks to this interface between the global, national and local. Filling an important gap in global health governance scholarship in India, the book is a useful contribution to the fields of Global Health Policy, International health and Development, Health Systems, Health Inequalities, public health, public administration, development studies, social work, nursing, management studies and mainstream social science disciplines that engage with globalisation and health. **Out of the Dead House** - Sep 04 2021

In the last decades of the nineteenth century, two thousand women physicians formed a significant and lively scientific community in the United States. Many were active writers; they participated in the development of medical record-keeping and research, and they wrote self-help books, social and political essays, fiction, and poetry. Out of the Dead House rediscovers the contributions these women made to the developing practice of medicine and to a community of women in science. Susan Wells combines studies of medical genres, such as the patient history or the diagnostic conversation, with discussions of individual writers. The women she discusses include Ann Preston, the first woman dean of a medical college; Hannah Longshore, a successful practitioner who combined conventional and homeopathic medicine; Rebecca Crumpler, the first African American woman physician to publish a medical book; and Mary Putnam Jacobi, writer of more than 180 medical articles and several important books. Wells shows how these women learned to write, what they wrote, and how these texts were read. Out of the Dead House also documents the ways that women doctors influenced medical discourse during the formation of the modern profession. They invented forms and strategies for medical research and writing, including methods of using survey information, taking patient histories, and telling case histories. Out of the Dead House adds a critical episode to the developing story of women as producers and critics of culture, including scientific culture.

Recognizing the quirk ways to get this ebook **Discourse Of Medicine Dialectics Of Medical Interviews** is additionally useful. You have remained in right site to start getting this info. acquire the Discourse Of Medicine Dialectics Of Medical Interviews associate that we give here and check out the link.
You could buy lead Discourse Of Medicine Dialectics Of Medical Interviews or get it as soon as feasible. You could quickly download this Discourse Of Medicine Dialectics Of Medical Interviews after getting deal. So, subsequent to you require the ebook swiftly, you can straight acquire it. Its so definitely easy and so fats, isnt it? You have to favor to in this expose
